

THE WOOD WALL PANEL CO's RANGE OF WPC SLAT WALL CLADDING GIVES A LOW-MAINTENANCE, EASY INSTALL ALTERNATIVE TO TRADITIONAL TIMBER CLADDING

THE LOOK

Our wood composite slat wall panels give the appearance of a real woodgrain timber finish that is rot, fade, warp and stain resistant.

EASY TO INSTALL

The panels have a unique interlocking design making them super easy and quick to install with standard equipment and tools.

DURABLE

Manufactured using high quality base materials, the panels are strong and durable made to withstand external conditions, are totally waterproof and are fade, rot and mould-resistant.

LOW MAINTENANCE

The panels are super low maintenance and do not need to be stained, painted or treated. Simply wash down with soapy water and a hose.

SUSTAINABLE

We pride ourselves on using sustainable materials where possible. All our panels are manufactured using a high percentage of recycled materials. Our external panels are manufactured using 90% recycled wood flour and plastic and 10% virgin materials (colour pigments and stabilisers).

KEY FEATURES & BENEFITS

- Easy to Install
- Strong and Durable
- Eye Catching
- Sustainable
- Waterproof
- Scratch, Rot & Mould Resistant
- Low Maintenance

Product	WPC Exterior Slat Wall Panel
