

As a popular alternative to traditional natural wood cladding, C-Clad offers a solution that is:

- Environmentally friendly
- Durable
- Sustainable
- Easy to Install
- Fade and Rot Resistant
- Low Maintenance
- Improves Thermal Conductivity
- Improves Acoustic Performance
- Adds value
- Decorative

Not only is C-Clad composite cladding aesthetically pleasing, it is made entirely from recycled materials making it a sustainable and environmentally friendly choice.

Incredibly resilient to all the British weather has to offer, the durable outer shell which encapsulates the board gives it a unique layer that protects from scratching, fading and rotting and gives a long-lasting layer of protection to any exterior wall.

The perfect addition to any garden room, outdoor office, carport, pergola, enclosed patio area, garden kitchen ... the possibilities are endless.
